American Standard Company
Manufacturer Of The Original Florian® Ratchet Cut Pruning Tools

157 Water Street * Southington, CT 06489 * 1-800-275-3618 * www.florianratchetcut.com

CONGRATULATIONS ON THE PURCHASE OF YOUR FLORIAN® FOLDING SAW

If this is the first time using our saw, here's how it works:
The Florian® folding saw is designed to cut on the push or pull stroke. The blade must remain in branch to secure Form snapping. It is not recommended to push the saw. Caution is needed as binding of the saw blade within its' kerf may occur. As with any saw, if the branch being cut starts to fall and the saw binds/pinches during the return or push stroke the saw will flex severely and actually snap if too much force is applied. The saw is not guaranteed to withstand this abuse. If this does occur replacement blades are readily available. We recommend you save the old dull or broken blades for occasional root pruning and continue using a new blade for top branches.

CARE AND MAINTENANCE
Always keep your saw blade clean and lightly oiled to help prevent the blade from rusting.

IMPORTANT INFORMATION
The saw blades are pre-tempered high carbon steel, hard chrome plated to prevent rusting and prolong life.

LIFETIME WARRANTY
The Folding Saw has a Lifetime Warranty against defects in materials and workmanship. Failure due to misuse or normal wear and tear is not covered under the lifetime warranty. All warranty claims will be evaluated and repaired or replaced at the discretion of Florian tools.
